Klass Hero

Klass Hero is a Berlin/Brandenburg based marketplace that connects families with vetted providers of children's activities. We're a small founder team building a product for the growing after-school care market in Germany, and we build it ourselves.

Internship: Software Developer (Elixir) (m/f/d)

Remote

Build real software for families. Early-stage team.

Tasks:

- Using Elixir, build and extend features in Phoenix LiveView (server-rendered, real-time UI)
- Work on core marketplace flows: provider onboarding, session management, bulk enrollment, and messaging
- Work through GitHub issues, pull requests, and code reviews
- See how a two-sided marketplace works from the inside: supply and demand, pricing and commission, trust and safety, and how product decisions affect growth

Requirements:

- You study computer science or something similar
- You can code on your own, without relying on AI tools
- You understand your own code and can explain it
- Elixir experience is a plus, but willingness to learn is enough
- Interest in how businesses and marketplaces work
- Initiative: you ask when you're stuck

What we offer:

- Direct mentoring from our CTO, with a weekly 1:1
- Real production code, not throwaway tasks
- Code reviews and honest feedback
- Flexible hours around your studies
- Reference letter
- Real impact: your work helps families find safe, vetted activities for their kids
- Insight into building a startup, from product to business model
- Type: mandatory university internship (Pflichtpraktikum, proof from your university required), unpaid
- Location: Berlin or remote
- Hours: about 10 per week, flexible around your timetable
- Duration: by agreement
